Heritage you can stand on.

2026 FOOTWEAR STYLE GUIDE

Tradebuilt

Every job you step into was made possible
by the effort of someone before you.

The roads you walk,
the shops you work in,
the machines you rely on.
Generations of workers
laid these foundations.

Now it's your turn to keep building.
Dickies work boots are made
for the long days, tough environments,
and demanding labor that comes with the job.

Built with the same grit that has
powered workers for generations,
these boots are made to take the hits
and keep you moving forward.

Because when the job demands everything,
you need boots built from a history of hard work.

Heritage you can stand on.

INTRODUCING

WORK BOOTS

BUILT WITH PURPOSE

FORM

Clean lines and balanced proportions define the aesthetic. Materials are chosen with intention, creating a look that is both timeless and purposeful.

FUNCTION

Designed around the realities of work, long hours, constant motion, and demanding conditions. Every element supports the worker without getting in the way.

MAKE

Crafted with precision and care. Durable materials, considered construction, and attention to detail come together to create something built to perform, every single day.

Practical Tech Made for Work & Style

Built for demanding jobs and everyday wear, our footwear combines cutting-edge safety innovations with comfort-driven design. Learn how each technology helps you perform at your best while looking great on and off the job.

Safety Toe

Steel Toe and Composite Toe styles meet or exceed current ASTM F2413-24 safety footwear standards for impact and compression protection.

Security Friendly

Security Friendly footwear features a metal-free safety toe, as well as no exposed metal, that helps reduce delays at security checkpoints and metal detectors.

Slip Resistant

Styles tested to the ASTM F3445-24 Slip Resistance Standard deliver dependable grip and confidence in demanding work environments.

Dual-Density PU Insole

Dual-Density PU Insoles are designed to deliver the ideal balance of comfort, support, and responsiveness helping to reduce foot fatigue and keep you comfortable throughout long workdays.

Electrical Hazard Protection

Electrical Hazard Protection meets or exceeds ASTM F2413-24 and ASTM F2892-24 Electrical Hazard (EH) Standards helping reduce the risk of electrical shock. EH footwear provides secondary insulation under dry conditions.

Static Dissipative SD10

ASTM F2413-24 and ASTM F2892-24 (SD10) footwear dissipates static electricity from the body to reduce the risk of excessive electrical charge buildup. *Not for use where EH footwear is required.

Waterproof

Waterproof material is designed to help keep feet dry and comfortable by preventing water from penetrating the footwear in wet working conditions.

EVA and Rubber Performance Sole

Advanced sole combines lightweight EVA cushioning with durable rubber traction for reduced fatigue, flexible comfort, reliable grip, and lasting wear.

Premium Materials

From high-quality leathers to advanced textiles, every material is chosen to help maximize wear life and elevate both fit and feel.
