SKYLOC® II AVIATION SERIES 40'

4008040-1

The SkyLoc® II Aviation Series utilizes a high-strength braided Dyneema® rope as opposed to wire rope, which greatly reduces the risk of damage to adjacent structures such as fuselage skins, leading edge slats, ailerons and flaps.

These self-retracting lanyards are the perfect choice to protect your valuable human and aviation assets at the same time!

KEY FEATURES:

- High-strength braided Dyneema® rope
- Fiberglass-reinforced nylon housing
- Load-bearing steel frame
- Over-sized steel anchor swivel
- Patented, non-centrifugal FailSafe™ locking mechanism
- Lightweight and incredibly rugged
- Exceeds the Class 1 requirements of ANSI Z359.14-2021
- Exceeds the requirements of OSHA 1910 and 1926
