MAXVIEW FACE SHIELD

QUICK START GUIDE

Window installation and headgear attachment.
Read the full instruction manual before use.
Face shields are secondary eye protection.
ALWAYS use safety glasses when wearing a MAXVIEW face shield.

Scan for video instructions

1 Install the Window

Remove the protective film from both sides of the window before using your MAXVIEW face shield.

Pull the chin guard downward and seat the bottom edge of the window between the lower tabs of the frame.

Press the top center of the window into the upper track of the frame.

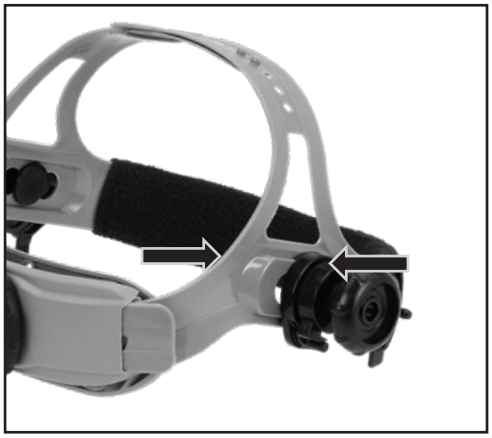

Push the window toward the top corner so the upper corner slides into the side slot of the frame.

Repeat on the opposite corner. The corner should be visible on the inside of the frame.

2 Install the Ratcheting Headgear

Attach the headgear to the frame one side at a time.

Arrows show where to grip.

Completed assembly (rear view).

1. Grip the headgear with a finger on the head of the mounting stud (inside) and your thumb on the edge of the pivot stop (outside), then remove the pivot knob.
2. Insert the threaded end of the stud through the hole in the frame and reattach the pivot knob.
3. Repeat step 1 on the opposite side of the headgear.
4. Repeat step 2 on the opposite side of the headgear.
