

NEW Heritage Brick Cast-in-Place Composite Paver™

Designed with a high definition brick pattern, the Heritage Brick paver allows you to incorporate the classic look of brick pavers without sacrificing safety or ADA compliance.

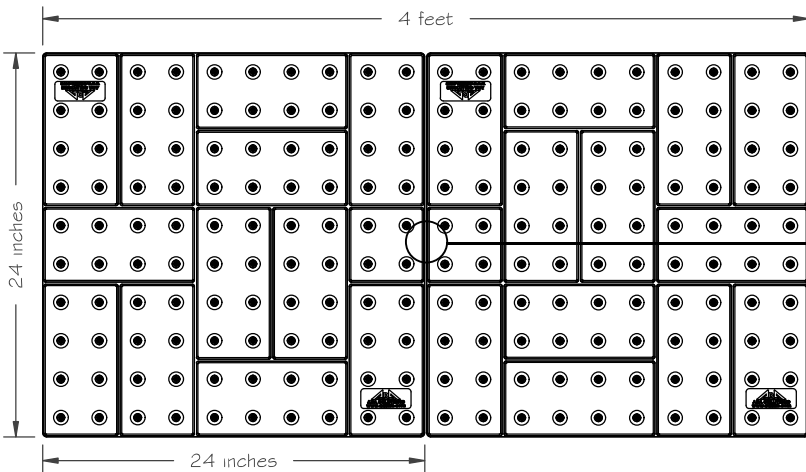

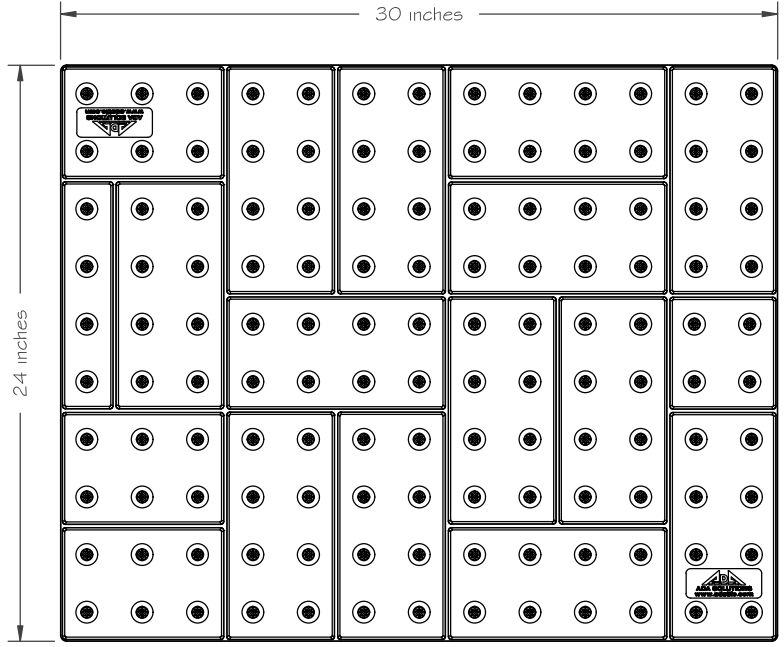

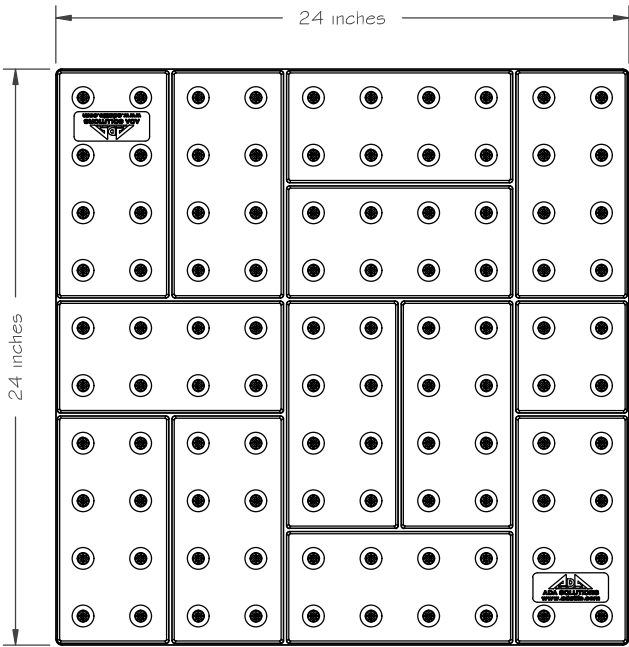

- **Eliminates trip hazards and maintenance issues**
- **More durable than brick or concrete pavers**
- **Based on proven ADA paver design**
- **ADAAG / PROWAG compliant**
- **Available in standard and new Stonescape UV+ colors**

Heritage Brick

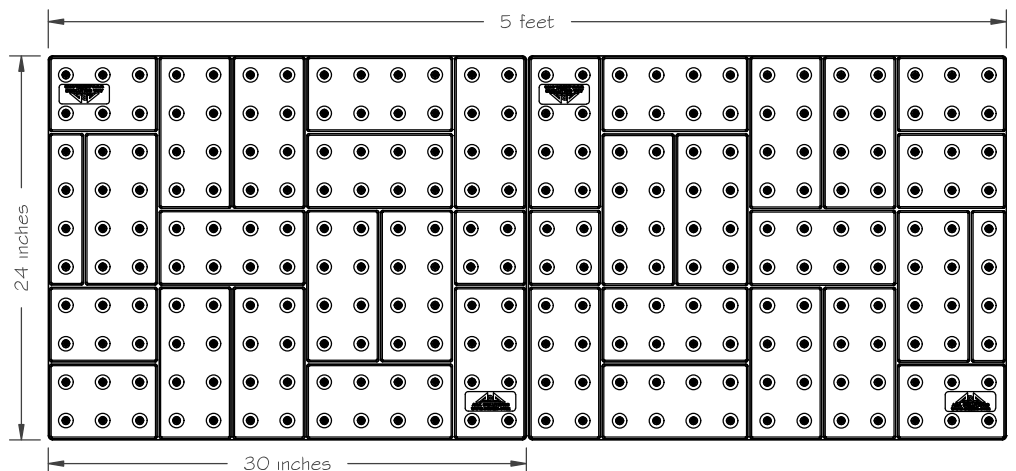

Cast-in-Place Composite Paver

available in two sizes; 24"x24" and 24"x30"

Half
brick
location
on each
panel

These sizes can be combined and configured to fit standard sidewalk widths of 4ft or 5ft. The basketweave brick pattern is easily and seamlessly kept consistent by matching the half brick located on each panel.

For more detailed instructions or assistance with paver layouts and configurations to meet your needs, contact your ADA sales representative.
