

# HI-VIS SAFETY VESTS WITH COOLING PANELS

Engineered for hot job sites, these hi-vis cooling safety vests combine breathable polyester mesh with removable evaporative PVA cooling panels to help regulate body temperature in extreme conditions. Activate the panels with water for hours of cooling relief — or remove them for lightweight, all-season performance. Featuring a durable zipper closure, premium StarTech® reflective tape, and functional cargo storage, these vests deliver visibility, versatility, and comfort on the job.

## HI-VIS SAFETY VESTS WITH COOLING PANELS

### COOLING PERFORMANCE

Breathable polyester mesh paired with integrated evaporative PVA panels helps regulate body temperature in high-heat environments.

### ACTIVATED COOLING

Removable PVA cooling panels activate with water — simply soak, wring, and reattach for long-lasting cooling relief throughout the workday.

### ALL-SEASON VERSATILITY

Wear with panels for active cooling in hot conditions or remove them for lightweight hi-vis protection in cooler weather.

### HIGH VISIBILITY

Premium StarTech® reflective tape enhances contrast and job-site visibility for increased safety.

### FUNCTIONAL STORAGE

Two mic tabs and two lower cargo pockets provide convenient storage and hands-free communication.
