

DUAL SENSE. ZERO NONSENSE.

NO MORE FALSE STOPS. NO MORE COMPROMISES.

F.L.O.™ SRLs redefine fall protection – delivering the perfect balance of safety, speed, and productivity. Traditional SRLs lock up too easily, slowing work, frustrating crews, and leading to dangerous habits like unhooking. F.L.O. eliminates that risk at the source.

DUAL MOTION DETECTION

F.L.O. is the first SRL with **dual motion detection**, sensing both **velocity and acceleration** to tell the difference between a real fall and regular movement. It locks when it should – stays out of the way when it shouldn't.

FEWER NUISANCE LOCK-UPS

Keeps crews moving with fewer interruptions.

LOWER FALL CLEARANCE & ARREST FORCES

Both, not either/or.

BETTER COMPLIANCE

Workers stay tied off when gear works with them.

MORE PRODUCTIVITY

Less downtime, faster workflow.

BUILT FOR THE JOB

- Rugged, shock-free housing
- Durable, protected labels
- Swiveling connectors
- Rolling-friendly, ergonomic design
- Lightest-in-class Class 2 pSRL options

4710000-30 F.L.O. 30' CLASS 2 SELF-RETRACTING LIFELINE
4700000-50 F.L.O. 50' CLASS 1 SELF-RETRACTING LIFELINE

FEATURE	TYPICAL SRL	F.L.O. SRL
Lock-Up Trigger	Velocity only	Velocity + Acceleration
Nuisance Lock-Ups	Frequent	Ultra Rare
Fall Clearance	Moderate to High	Industry-Low
Arrest Forces	High when FC is low	Low with Low FC
Impact on Productivity	Negative	Positive & Proven
User Experience	Frustrating	Smooth & Seamless

NO TRADE-OFFS. JUST PROGRESS.

F.L.O. is more than an upgrade – it's a breakthrough. The first SRL to truly prioritize both safety and productivity.

DUAL SENSE. ZERO NONSENSE.
