

# GLACIER TREK TUNGSTEN CARBIDE SPIKES

## TALL

### ICE GRIP GSRCBTP-TL-O/S

Steel Gray  
Unisex  
One Size – 32 per pack w/wrench

When winter becomes extreme, the Tall Tungsten Carbide Spikes step up. Designed with a longer profile to bite deeper into ice and packed snow, they offer maximum traction for the most unforgiving conditions. Rugged stainless-steel bases with protruding carbide tips deliver unmatched durability. Compatible with NEOS Glacier Trek overshoes and built to replace old cleats, these spikes lock in grip where others fail. Tighten with the included wrench to stay secure in the field.

## SHORT

### ICE GRIP GSRCBTP-O/S

Steel Gray  
Unisex  
One Size – 32 per pack w/wrench

Built for harsh winter terrain, the NEOS Glacier Trek Tungsten Carbide Spikes deliver long-lasting traction with a stainless-steel base and carbide-tipped design. Engineered to replace worn-down cleats, they restore grip and stability on icy and packed snow. The threaded spike system is easy to install and secure, ensuring every step stays confident and slip-free, from jobsite to mountain pass. Wrench included for tightening before and after use.
