PRECISION LAYOUT AND TOOL GUIDE – LARGE CATALOG

Curv-O-Mark® layout systems have earned a reputation for quality and consistency over a wide range of industries. Easy to use, made to use longer, there are Curv-O-Mark® tools to help bring precision to most any layout task.

Contour Marker

The Curv-O-Mark® Contour Marker is compact, time-saving tool used to lay out pipe and structural steel joints. Laterals at any angle, tees, wyes, crosses, elbows any type or size of joint can be guickly and precisely laid out. No more complicated mathematical formulas. No more cut and try. No more needless material waste. The Contour Marker can be used to lav out pipe from 1-1/2" to 18" diameter or structural steel members up to 18". The Contour Marker consists of an X-shaped frame, calibrated protractor, and a triple-jointed marking arm and holder. The holder accepts a soapstone crayon (included) felt pen, or pencil.

Canada:

SureWerx, 49 Schooner St., Coquitlam, BC V3K OB 3

surewerx.com

JSA:

SureWerx USA Inc., Elgin, IL, USA 60123

surewerx.com/usa

The frame easily folds into a compact tool that fits into a pocket or carrying case.

It can be used right side up or upside down, depending on the direction of the line to be scribed. The protractor is calibrated on both sides – one in degrees, the other in rise-inches-per-foot - to service any type of measurement needed. The unit comes with a Structural Adapter designed to simplify the layout of structural joints, including I-beams, angles, channels, square tubing and similar shapes. The optional Combination Adapter Accessory allows the Contour Marker to lay out joints on larger size pipe, as well as scribe compound angles with just one setting.

The Contour Marker is made from durable, lightweight aluminum. It requires minimal maintenance, only occasional oiling of joints, to provide long service life.

CONTOUR MARKER

0721-0000......Stock No. 1

Europe:

Balder d.o.o Teslova ulica 30, SI-1000 Ljubljana, Slovenia

jacksonsafety.eu

The Contour Marker is easy to use. Layout angles are set with the marker's calibrated protractor and scribed directly onto the pipe using the marking arm. No mathematical equations are required.

Large Contour Marker

A larger version of the Contour Marker, the Large Contour Marker has been developed for use in the layout of large diameter pipe, from 8" to 48". With its Structural Adapter, the JCM can be used in the layout of extremely large structural steel members up to 48" wide.

The JCM comes complete with a durable web strap that helps hold the unit in place during layout. A built in adjustable dial bubble protractor ensures accurate centerline location. A soapstone crayon is included.

Like the standard model, the JCM's capability can be increased with the Combination Adapter Accessory.

CURV-0-MARK®

JACKSON°

Combination Adapter Accessory

Designed for use with the Standard and Large Contour Markers, the Adapter simplifies handling and increases layout capacity.

The Adapter permits use of all four sides of the Contour Marker and permits marking on small diameter pipe, over nipples, old welds, or on wrapped pipe. The Adapter can also provide layouts with compound angles using a single setting, or any degree of take off on elbows and turns up to 90°. A built-in protractor provides easy, accurate measurement.

Flange Aligner Base

Remove the difficulty of flange aligning and squaring with a simple tool that holds a square in the needed position without tying up one's hands.

The Curv-O-Mark® Aligner Base is notched at either end for ease in aligning on the centerline of the pipe and has two 25-pound pull, cast-in magnets for holding either a flat horizontal or vertical position. The Base will accept either leg of a standard or combination square and will work on pipe diameters from 1" on up, requiring only the extension of the legs of the square being used to accommodate larger diameters.

The Flange Aligner Base is made from lightweight durable aluminum. Cast-in magnets hold the flange aligner base in either a flat or vertical position. (Square not included.)

iacksonsafetv.eu

Pipe Flange Aligners

Fast, accurate pipe construction is possible with this self-determining flange aligning tool. The Aligner inserts easily into pipe centers, snugly against the inside pipe diameter and automatically aligns with the pipe axis.

The Pipe Flange Aligner is quickly adjustable for all types of flanges or pipe sizes ranging from 3" to 12" in diameter.

PIPE FLANGE ALIGNER

Circle Ellipse Projector

Perfect circles, ellipses, or oblong circles can now be easily made on any irregular flat or round surface.

CURV-O-MARK®

JACKSON

The Projector features a protractor with siding rods and an adjustable lever to lock in the specific layout. A strong, 20-pound pull magnetic base holds the Projector in position during layout. A durable web strap (included) holds the unit secure on non-magnetic surfaces and can be used on either side of the vertical column.

The Projector can also be used to lay out lateral intersections of different diameter pipes, or to project circles from 1-½" to 18" in diameter on flat surfaces intersecting at angles from 0 to 70° from vertical. Attachments to develop larger diameter circles are available.

The Projector is equipped with a soapstone crayon and also works with chalk, pencil or steel scribe.

Centering Heads

Curv-O-Mark® Centering Heads aid in the setting of centerlines, establishing angles, and marks for butt-ins, locating points inside pipes and tanks, laying out keyways and measuring declivity.

The Standard Model (shown below) is used on pipe ½" diameter and larger. It has a 4" Y-type head and is fitted with an adjustable dial bubble protractor (DSL) and is manually operated hardened centering pin.

The Large Centering Head (shown below) is for pipe 1" diameter and up. It has an 8" Y-type head, and a DSL. A spring loaded hardened centering pin eliminates the need for a hammer. Just make the alignment and press the trigger.

Balder d.o.o Teslova ulica 30, SI-1000 Ljubljana, Slovenia jacksonsafety.eu

Radius Markers

Models are available in four sizes for scribing circles up to 80" diameter. All are a folded type design – the three smaller models will fit conveniently into a pocket. All have sturdy friction joints to maintain rigidity and accuracy, and are made from lightweight, rustproof aluminum for long wear. A soapstone crayon is already installed in each radius marker

Multi-Trammel Heads

For reliable marking using standard ½" pipe, heads feature radius set points cast in alignment with marking pointers for easy setting. Each is equipped with ¼" screws and squared on the back side for perpendicular alignment. The stationary head holds a ¼" case hardened center point. The moveable head has a 1/8" steel scribe hardened to 59 rockwell. The chalk holder will accept round, square, or flat soapstone crayon, pencil, or

steel point scribe. Marks from 1-1/2" circle

to any diameter needed, depending on

CURV-O-MARK®

JACKSON°

length of pipe used as a trammel bar. Heads are made from durable aluminum. Each set weighs approximately 8 oz. An Allen wrench, soapstone, scribe, and pointer are included.

Multi-Trammel Heads

Allen wrench, soapstone, scribe and pointer are included.

Universal Level

The Curv-O-Mark® Universal Level is a multi-purpose tool. The unit features a 360° adjustable protractor dial bubble (DSL) that ensures accurate leveling and permits the following additional uses:

- Setting a predetermined pitch of a string or pipe
- Setting the angle of laterals to a precise degree
- · Trueing vertical runs
- Two-holing flanges

The Level has two cast-in 25 lb magnets (exerting a 50 lb pull) to securely hold the

Canada:

surewerx.com/usa

unit in place on any steel surface, including the underside of a pipe or beam. This permits hands-free leveling, a welcome aid in tight spots. And, since the bubble is mounted on a protractor dial, the Level may be used in any position and still read accurately.

While one face of the Level is magnetic. both faces have deep, cast-in grooves that make the Level self-centering on the contour of the pipe. Because the magnets are cast in, they do not interfere with the use of the Level on nonmagnetic materials, such as aluminum, copper, lumber, stone. or other materials requiring leveling. For aligning pipe flanges (two-holing), the Level comes with a two-threaded. self-aligning conical spacer and conical nut and bolt units. These are designed to fit any size bolt hole spaced between 2-1/4" to 8" centers on flanges. This permits the orientation of flange bolt holes for any size pipe.

Designed primarily for pipefitting applications, the Universal Level is a valuable tool for any craft required to use a level or a plumb bob.

For structural ironworkers, the powerful holding magnets provide an extra hand Electricians will find the Level useful in laying out and lining up heavy conduit With the aid of a handy conversation

Europe:

Balder d.o.o Teslova ulica 30, SI-1000 Ljubljana, Slovenia

iacksonsafetv.eu

chart, carpenters can use the level for the lavout of roof rafters.

Two-holing is simplified with the UniversalLevel. Self-aligning spacer bolt units are attached in the two adjacent bolt holes and the top or bottom of the flange. With the DSL dial set at 0 degrees, the flange is rotated until the bubble is centered. Bolt holes that are offset can be matched

Bolt holes that are offset can be matched by setting the DSL at the desired offset angle prior to rotating the flange.

A built-in adjustable dial bubble protractor (1) ensures accurate centerline location. A cast-in table (2) indicates rise per foot in both inches and meters. A cast-in groove (3) makes the level self-centering on the contour of pipe.

If adjacent top or bottom holes cannot be used, two-holing can be achieved using side bolt holes. In this instance, the DSL dial is set at 90 degrees and the flange is

CURV-O-MARK®

JACKSON

rotated until the bubble is centered.

UNIVERSAL LEVEL 0721-0030......Stock No. 33

Pro Mag Level

A lightweight, easy to use tool for determining angles, the Pro-Mag Level has two cast-in 25 lb pull magnets that hold securely to any steel surface. The unit has a 360° adjustable DSL with two 90° quadrants graduated in 2-½° increments. Also cast in are tables used to convert degree-of-angle to rise-in-inches-per-foot or millimeters-per-meter. A groove on the bottom edge permits use on a small pipe. The Pro-Mag Level is 9" long, 2" high, and 34" thick. It is made from cast aluminum.

The unit is ideal for pipefitter, welder, jib guilder, or anyone who has to determine angles or do setup work.

A built-in adjustable dial bubble protector (1) ensures accurate centerline location. A cast-in table (2) indicates rise per foot in both inches and meters. A cast-in groove (3) makes the level self centering on the contour of pipe.

Dual Angle Flange Level

A versatile tool that can be used as a dial degree utility level or, with attachments, for two-holing flange alignment.

The unit is made of cast aluminum with a protective housing containing an adjustable DSL. It is also fitted with a threaded, self-aligning conical spacer and a conical nut and bolt units for fastening the Level to a pipe flange. One of the nut and bolt

Europe:

units is stationary, while the other slides up to $5-\frac{1}{2}$ " along a slot in the level to accommodate various flange bolt hole spacings from 2" to $5-\frac{1}{2}$ ". The body of the tool is $\frac{1}{2}$ " thick with a machined surface. The level bubble is protected from weld splatter and breakage with a built-in housing around the DSL.

DIAL-ANGLE-FLANGE LEVEL 0721-0017......Stock No. 20

Wrap-A-Round

An inexpensive tool for marking straight lines around pipe, or for use as a straight edge. Made out of flexible gasket material with good resistance to heat and cold. All Wrap-A-Rounds are available in two colors. These designate material type and service temperature.

GG (Gray) material is used for high

JACKSON°

temperature applications up to 550°F. B (Black) material has a service temperature of up to 350°F. Both material types are ashestos free

Extra small and special order sizes are unmarked. All other sizes are printed with a scale in inches, pitch chart, tangent chart, and other useful markings. Wrap-A-Rounds in 3.88" and 5.00" feature a metric scale and pitch chart.

Fitter Welder Protractor

This 90° protractor has a matching locking lever to set and hold the tool at the desired angle. It is equipped with a 5/8" x 10" tapered arm to complete finding of angles or desired bends, or to determine any portions of elbows.

This tool is mounted in a ¾" wide frame with a 3/8" x 6" cast-in rod. It comes with a 25 pound pull magnetic base for holding the protractor frame in position. The unit can be used manually or with a magnetic base, as shown below.

FITTER WELDER PROTRACTOR 0721-0008......Stock No. 9

Pro-Mag Burning Square

The Curv-O-Mark® Pro-Mag Burning Square is a precise tool used in structural thermal cutting and layout. The tool base is a perfect square containing powerful cast-in magnets. This permits placement in any position. The tool surface is embossed with a protractor inscribed

with two 90° quadrants graduated in 1° increments. The top of the tool carries an 18" ruler blade divided in 1/8" increments. The ruler can be locked in place at the desired angle setting by hand tightening of the adjustment knob.

The ruler blade is on a raised plane. This permits its use as a straight edge when flame cutting, without distortion or marring. The blade will also accept attachments or extensions that allow an overall length up to 72". The Burning Square is made of cast aluminum.

Angles can be easily locked in place by hand tightening the adjustment knob.

The ruler blade is on a raised plane, which makes it ideal for use as a straight edge when flame cutting, without distortion or marning.

Magnetic Burning Guide

Designed for use with a burning torch or as a straight edge, the Burning Guide is cast of strong, durable material to withstand heat and spatter. The tool's base has three 30 lb pull cast-in magnets for use in any position. A 24" blade on a raised plane is standard.
